

Get in the zone with Drop Zone!

LAI has another great addition to its prize merchandising lineup with Drop Zone. An LED playfield sets the stage for simple but inviting game play that has players attempting to catch a stack of falling blocks between a pair of “catcher” blocks. It works very much like the children’s game of trying to catch a falling ruler between your hands.

As play continues, the blocks fall faster and the catchers get smaller. Players who reach the 9th or Minor Prize Level can choose to accept an inexpensive prize or continue trying for a more valuable Major Prize by reaching Level 12. Drop Zone is a great way to spice up any location and give players a new and exciting challenge!

Drop Zone Features
