Shelti Eye²

Coin-Operated Electronic Dart Machine
Model # SD-A-E2

MADE IN THE USA

Shelti Eye²

Coin-Operated Electronic Dart Machine

Shelti Eye² Machines come with:
6 Darts, 250 Tips, Stability Kit, Allen Wrench, Throw Line, Standoff Tool, Warranty Registration, and Instructions.

Available Kit/Options:
• Dollar Bill Acceptor
• Four color, Bristle-Board Looking Target
• International Size Target

Model # SD-A-E2

Height: Full 86" Folded 45"
Base: 24" x 24"
Cabinet: 24" x 15"
Ship Weight: 180 lbs.

Fold-in-Half Transportability
Hinged cabinet design makes the game easy to set up, break down and transport.

New light fixture design folds during shipping to optimize space.

"TRU-SCORE" for Absolute Scoring Accuracy

Tavern-Tested T60/30 Target
Since the late 1980's, the T60/30 target has provided more target area and less "spider" than any competitor.

Hinged target design enables easy access to the matrix and segments from the front of the game.

Interchangeable with 4-color and international size targets.

Piezo "Missed Target" Sensor

Striking New Graphic Design
Brilliant blue graphics and dynamic diamond plate compliment a cool, new look for the workhorse of electronic dart machines.

Expandable Controller Design
Forward-thinking design includes hardware support for current features and displays, as well as SD (Secure Digital) Flash Memory and MMC (Multi-Media Card) Flash Memory, RJ12/RS232, and a serial port for expansion and future capabilities.

Software upgrades and operator-specific pricing and feature settings are simply done through the portable SD or MMC Flash Memory devices. This class of device was also selected for future storage capabilities, if needed.

RJ12/RS232 enables future online features and the serial port provides a path for controller board expansion, if necessary.

Diamond Plate

Standardized and Adjustable Handicap Systems
Compliant with leading dart associations, including the National Dart Association guidelines for spot points and spot marks handicapping. Operator programmable adjustment for minimum starting score and maximum awarded marks. Also includes standardized American Darters Association Neutralizer® system.

Highly-Visible Overhead Scoring
Easy-to-see for both players and spectators, even in the busiest locations.

New dot matrix display area provides player instruction before and during game play, and improves communication of feats afterward. The new display also enables a path for future capabilities, including personalizing the game to the operator, location, and player.

Auto and Manual Player Change
Operator programmable, including delay timers for automatic and manual player change. New electronic player change button features no moving parts.
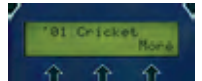

Phone-Style Keypad and LCD Menu Operation
Back lit LCD and 3-button menu enhance operator setup and statistics reporting. Phone-style keypad provides path to support future features that require player or operator alpha-numeric input.
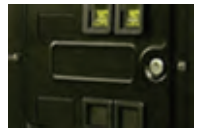

Multiple Games and Game Options
Includes "old favorites" like "01" games, Cricket, and Hi Score games, and popular Wipe Out, You Pick It, and Cut Throat options. Also features fun, speed-based games like Rapid Fire.

Coin and Currency Door
Validator door provides room for a bill acceptor with either a 250-bill or 500-bill stacker. Door is standard with two coin mechanisms.

Optional League Slot

Throw Line Notch

Programmable Operator Pricing and Round Limits

Expectations were high with the new Shelti Eye². So was the bar.

The Shelti Eye² electronic dart machine has been designed to set the industry standard for both playability and reliability. The hinged cabinet design makes the game easy to set up, break down and transport. The target and most electronics are service-accessible from the front of the game. The target assembly, overhead display and three-button player menu selection are similar to other models. With eyes towards the future, we also included SDRAM, serial and RJ 12 capabilities built on the controller. And as you can see, brilliant new graphics and striking diamond plate compliment a cool new player-change button. The new Shelti Eye²—designed to hit the mark.
