Assembled Size:
41" L. x 36" W. x 51 3/4" H.

Cabinet Apron Ht:
4 1/2"

Weight:
230 lbs.

6-Month "Top to Bottom" Limited Warranty

Model # DM-Y-AB-1

Ultra-Smooth Chrome-Plated Rods
Hollow-ground steel with 0.120" wall thickness. Marriage of high-lubricity materials—nylon bushings and rods—result in exceptional play performance with minimal friction wear.

Solid Upper Cabinet Construction
MDF interior and a decorative, brushed aluminum exterior.

Steel Rod Supports in Foot of Men
Allows torque and pressure to be applied to the clutch, rather than the fitting between the man and gear box.

Playfield Supports Across Entire Surface
Supported on all 4 sides of the cabinet, by 2 beams running between the rods, and the tops of the player gear boxes.

Gear boxes are supported by durable extruded aluminum channels.

Split Molded Base with Levelers
For easy installation through tight spaces.

Includes 4 leg levelers to assure level play surface—adjustable to 1".

Infrared Electronic Scoring
Utilizes infrared scoring for reliability and accuracy. Sounds goal scored. Side mounted to keep player sight lines clear. Select from several game options including 15, 10, or 5 minute games, race to score 10, 7 or 5 goals, or unlimited Free Play.

Gear Box Clutch System
Designed to "give" when opposing man-to-man force is applied—reduces likelihood of stick or man breakage and extends life of gear box.

2:1 Turning Ratio on Gear Box
Delivers quick player response and lively play—360 degree player turn requires only 180 degree handle turn.

Dome "Bubble" is Fastened with Hinges
Easy access to men, goals, and playfield.

Attractive Playfield Graphics
Screened into high-pressure laminate and covered with a protective clear-coat for long wear.

6-Month "Top to Bottom" Limited Warranty

If it sounds like hockey, looks like hockey and feels like hockey, it's gotta be a Blue Line.

Bring the sites and sounds of an amusement favorite right into your home. The play is fast and the scoring is spectacular. The Slapshot features a unique gear box with a 2:1 turn ratio for quick player response and lively play. Turning players 360° requires only a flick of the wrist. And so the team doesn't get too worn out, we've designed

a clutch system that "gives" when there is opposing player-to-player force. The ultra-smooth rods are all chrome-plated, hollow-ground steel with 0.120" wall thickness and are coupled with nylon bushings for minimal friction. It's this sort of attention to detail that makes it a Blue Line... and makes Slapshot Dome Hockey such a big hit.
