

SEGA®

Operation Ghost | Sega | Video

Sega's realistic tactical light gun shooter is back. Operation Ghost puts players in the boots of highly trained special force agents. They must use precision shooting and quick reactions to complete the mission while using some of the brand new tools at their disposal!

2 Player | 42" DLX and 55" DLX available | LED monitor surround synced to in game action | Available in Russian

As well as new weapons, gadgets and equipment, Operation Ghost features a full coloured LED monitor surround which is synced with the in-game action. This, combined with a gun mounted speaker, as well as the return of the popular challenge sections, provides a game play experience that will really immerse the players in to the intense world of the G.H.O.S.T.'s.

Enemy scanning

This neat piece of gear will warn you of enemies who are about to appear from behind walls or cover. If your good enough you can take them down before they know what's hit them!

Laser sight

Players can see the laser sights of the enemies. When the sight is pointed directly at them, the player is in danger. Take them down before they take you down! Works in conjunction with the LED lighting.

Team order

Tactically split the team to flank the enemies, use this tactic wisely, you comrades fate is in your hands!

Full colour LED monitor surround
