

Installing Router and hooking two Ticket Monsters together (Part # AAKIT-TM-MARQ & AAKIT-TM-MARQ1)

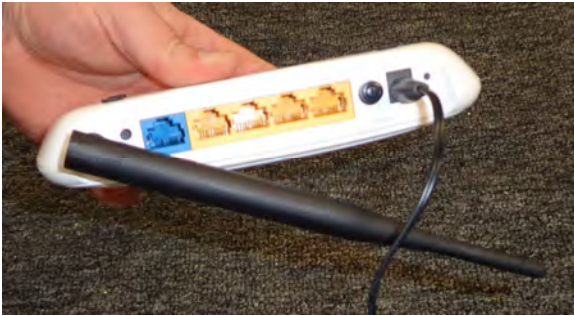

STEP 1: From the left front door using the Jig provided mark both holes for screws.

STEP 2: Where you just marked your holes install 2 Silver pan head screws but don't tighten all the way down (will need them to stick up about 1/16 of an inch for router to slide on)

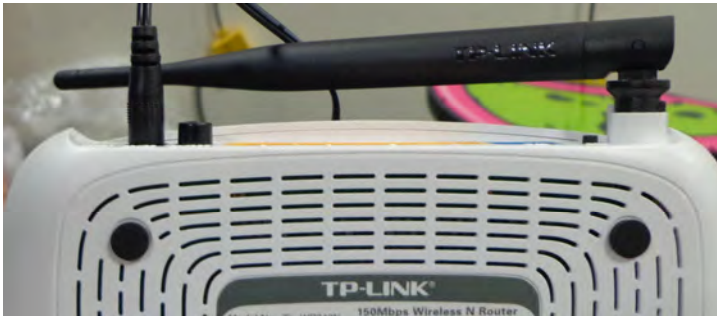

STEP 3: Unwrap and plug the power into the Wireless Router

STEP 4: Make sure that the Wireless Router is turned on (pushed down is on)

OFF

ON

STEP 5: Install router by sliding the back onto the screws put in on

STEP 6: Plug Router into Power Strip

STEP 7: Plug in CEXXXX and Purple Network Cable cable into router and into MB8 PC board
Both Cables MUST plug into the yellow sockets.

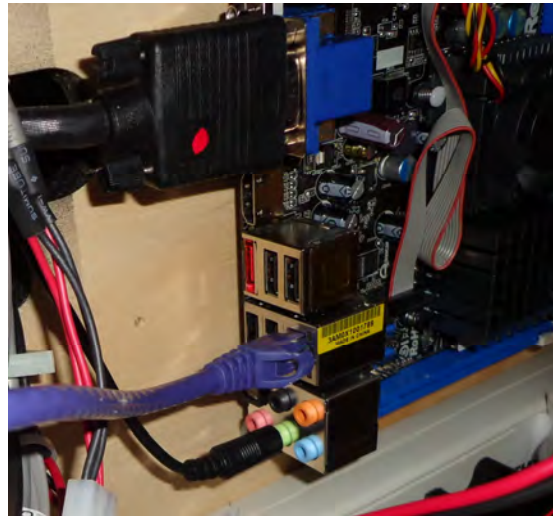

STEP 8: Using reference point of the bottom of the circle use a 5/8” drill and drill hole through the side guard and side on both games. (If you are connecting only one game then drill out the left side and if connecting 2 then drill out both sides)

STEP 9: remove left side wing and attach middle wing with the same screws that you took out

STEP 10: Route purple cable through the holes that were drilled in step one into second game and plug it into MB8 PC board

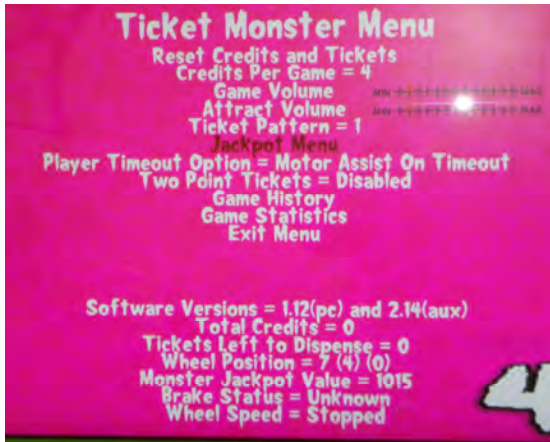

STEP 11: Move second game next to first and screw in monitor to the back of the center wing.

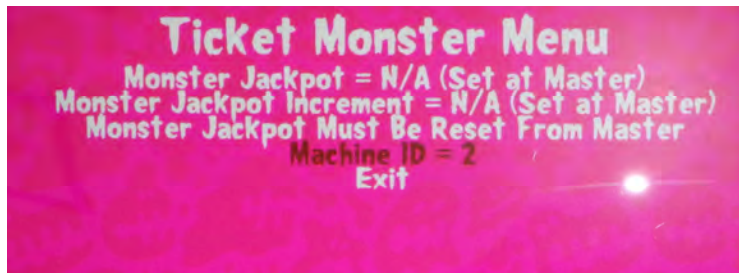

POWER UP GAMES

STEP 12: Go into the menu and select the jackpot menu and you will come to this screen (the Game with the Router in it is the Master)

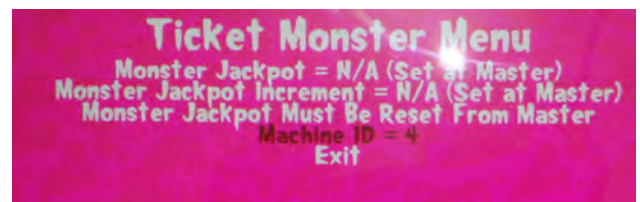

STEP 13: The games that do not get the router should be set to “2”

Note: If more than 2 games are linked together, then an additional kit must be purchased. For each additional Ticket Monster added to the existing pair, one of AAKIT-TM-MARQ1 must be purchased.

The games are attached using the same process. However, the additional games must be set in the menu to different Machine Id's as shown:
