THE DIGITAL PRINCESS JUKEBOX

Powered by ECAST

Play a Wurlitzer jukebox and you make more than just a song, you make a moment. For more than 100 years, the Wurlitzer brand has united people with the power of music. Since jumpstarting the jukebox's Golden Era in the 1940s, Wurlitzer has upheld its reputation for innovative design and fine craftsmanship by manufacturing the most iconic and gorgeous models on earth. The Wurlitzer has stood the test of time as the world's favorite jukebox. Wurlitzer's Digital Princess continues that tradition.

Powered by the Ecast broadband music and media network, the Digital Princess delivers a fun, interactive music experience that keeps patrons coming back for more. A touch of the finger is all it takes to access an almost endless selection of the hot hits and classic tunes people want to hear. What's more, new music is added every week, allowing patrons to listen to many new albums just one day after street release! No other music network provides music this fresh.

In keeping with the charm of the first Wurlitzer designs, the Digital Princess comes equipped with a dazzling light display, chrome elements, and a vintage-style bubbler. Also with updated sound capabilities, the Digital Princess—with strategic speaker placement, easily moves those on patios and outer rooms. A compact version of Wurlitzer's legendary One More Time model, the Digital Princess can be fit into tight spaces for instant retro charm and classic cool. Though the jukebox comes suited for wall mounting, it can also be placed on an optional pedestal cabinet.

The Digital Princess also offers operators the revenue and time-saving benefits of being part of the Ecast network and the industry's highest earning jukeboxes. They can take advantage of additional revenue streams, near real-time access to route revenue performance, and remote music management tools.

With the freshest music catalog in the industry, the Wurlitzer Digital Princess will entice patrons to linger, creating good feelings and lasting memories. When the first Wurlitzer jukebox was introduced more than 100 years ago, it brought people together. Today, it does that still.

Nobody leaves until the music's over

More than just jukeboxes, the eye-catching aesthetics of Wurlitzers have proven them to be works of art that historically go on to become collectors' items.

Old-world replica design
