

# NiteStar Duet™

Get the best of both worlds with the NiteStar Duet, the CD and Internet downloading jukebox powered by AMI Entertainment. Music on CDs can be played regardless of the record label or publisher, and music not found on the CD selection can be downloaded instantly. After its commercial life, the Duet holds its residual value because it can be used in a non-commercial application as a CD jukebox. While in commercial use, the NiteStar Duet allows operators to maintain privacy by keeping location information and income totals completely private.

For more information on the NiteStar Duet, contact your Rowe International distributor.
