**YOUR VENUE, YOUR MUSIC  
YOUR ICON BGM**

# IONBGM

## WALL MOUNTED BACKGROUND MUSIC SYSTEM

NSM Music's background music system, BGM, is the latest in technology, bringing the highest quality musical sounds instantly to your venue. There are 15000 tracks stored in the BGM divided into easy to use categories, genres and decade groups. The tracks are easily updatable and genres range from Bach to boogie woogie. NSM's user-friendly software allows you to be the Music Master, programming the tracks to play when you require them.

The 19" screen allows quick and accurate navigation in a matter of seconds to create a playlist, find a particular artist/song, start or stop the track playing, move tracks up and down the play list, even shuffle the list to give it a random feel.

Background music systems offer the ability to create ambiance instead of entertainment. Clients include restaurants, retail stores, bars and venues bars where high quality versatile music systems are required.

## TECHNICAL INFORMATION
