## You<sup>TM</sup>Tube UPGRADE KIT

The icon 2 ships as YouTube ready. If an operator requests the YouTube Kit for their Icon 2, they will be sent a simple kit comprising of the following items:

- Custom built circuit board
- Speaker
- USB Cable
- All fixtures and fittings

The installation of this kit is also very simple and hassle free - it only comprises of just 3 simple steps:

1. Mount the circuit board to the inside to the top panel using the screws and spacers provided. Plug the USB lead into the circuit board connector identified as J3 and into the first available USB port on top of the Ipac. Use the adhesive cable tidies for surplus cable.
2. Remove the cash box. Unscrew the cash box holding plate and place speaker on the grill beneath. Screw the cash box holding plate back on. The speaker will magnetically attach to the plate holding it in place.
3. Feed the speaker cable up the right hand side of the ipac up to the top of the unit. Use the cable tidies to secure it. Plug the cable into the 4 pin connector identified as J4.
