

# TICKET STATION

Introducing our *newest Ticket Station!* It retains all the capabilities of our current model but also has these **NEW FEATURES:**

- Enhanced and interesting sounds, and munching audio prompts!
- RGB lighting on the interior and exterior of cabinet with new light effects while unit is in use.
- Updated graphics and exterior "curb appeal".
- Accepts and recognizes tickets of different lengths and multiple bar codes: allows a location to assign a different ticket value per barcode.
- Learning mode: allows the unit to "learn" the length and barcodes of new tickets
- Improved Security – you can program which bar codes will, or will not be accepted – which allows you to run limited-time promotions or prevent counterfeiting.
- Easily adaptable to the following uses:
  - A. Tickets in/Standard receipt
  - B. Tickets in/Card Swipe
  - C. Tickets in/Choice of either a receipt OR values being applied to the card
- Monitors for marketing promotions, birthdays, food and beverage specials, etc.
- Ease of programming: Windows-based programming allows location to program SD card using an app on their PC, and then plug the SD card into the Ticket Station.

**PLAYERS LOVE WINNING TICKETS! INCREASE YOUR PRODUCTIVITY AND REDUCE WAIT TIMES AT YOUR REDEMPTION CENTER WITH OUR TICKET COUNTER!**
