

PAC-MAN GHOSTLY BOWLING

Pac-Man Ghostly Bowling has reinvented the traditional alley bowler. The concept is similar to an alley bowler, with minor changes making a major difference. The idea is to roll a ball up the lane and under the play-field. Once the ball goes under the play-field, it then rolls up and wraps around the back of the field where it will drop down from behind and into scoring holes.

One of the key features to Pac-Man Ghostly Bowling is the size. It's roughly 2/3 the length of a traditional alley bowler which allows locations to fit more games on their floor. The game has been designed to catch the eye of customers with it's vibrant colors and flashy LED lights.

Installed Dimensions: 30"W x 80"D x 97"H
Shipping Dimensions: 36"W x 85"D x 86"H 550lbs
Container Quantity (40'): 11
