

WHEEL OF FORTUNE

Players will experience all the excitement and thrills of the MEGA-HIT TV Game Show Wheel of Fortune®. A brightly lit replica wheel with ticket values, makes this cabinet stand out anywhere it is placed on location. Players position themselves in front of a player station, equipped with a 32" LCD touchscreen panel, directly in front of the wheel. From this panel players will begin by selecting regular "Wheel of Fortune®" or risk more with the "Double Play" option which offers the player three spins to maximize and double their ticket winnings. Just like the show, a puzzle will appear with a category. Players will then spin the brightly lit colorful Wheel of Fortune® dial to activate the replica wheel. Authentic game sounds will delight players and onlookers as the wheel gradually slows down to a ticket value. With a ticket value established, the player will select three letters and will receive the ticket value that was determined by the spin of the wheel. Ticket totals will soar if there are multiples of the same letter in the puzzle; if there are three "T's" in the puzzle the player would get 3X the ticket value. After selecting the three letters, players will get a chance to accumulate bonus tickets by solving the puzzle.
