GAMING INTERNATIONAL®

## FLOOR SPACE DIAGRAM

### **The Operator Friendly Zombie Snatcher:**

The operator has control over the speed of the rotating platform and the linear actuators that extend and retract the prize sweeping arms. The table speed is controlled with a potentiometer and the linear actuators are controlled through the programs options menu. This allows full control to adjust the difficulty as you see fit. The options menu also contains easy to use calibration for the motor controls and linear actuators.

Easy open top helps make short work of reloading prizes. Six locking side door panels allow you easy access to the internals of the game.

High quality components are used throughout this unit providing unparalleled reliability.

**Game Dimensions:** 67" diameter x 60.5" height.

**Shipping Dimensions:** 72" L x 72" W x 68" H

**Weight:** 560 lbs. **Shipping Weight:** 675 lbs.
