Metro™ Coin Pool Table by Brunswick®

Add a Touch of Class

Operator Features

The elegant new Brunswick® Metro™ Coin pool table continues to uphold the Valley-Dynamo™ standard of quality construction and technology. The Metro Coin's newly developed curved lines, color scheme and modern features give this new pool table visual appeal that will fit seamlessly into any location. The industry award winning technology developed with the Valley® Great Eight™ is now found in the new Brunswick Metro Coin pool table. The fully programmable Metro Coin, with self-contained battery operated bill acceptor, allows operators an unlimited variety of settings and options. Operators now have more control over profitable play with program options such as; time play, rack play, happy hour, bonus games, league play and Speedpool™. The four bolt dual density cushions, Championship™ cloth and the Saluc, Valley Certified Cougar® cue ball are all designed to maximize your profits and increase player satisfaction.

Player Features

The Brunswick Metro Coin pool table is the ultimate experience in coin-operated pool with its elegant appearance and superior playability. The imported slate, in combination with the fast championship cloth, allows for a perfect roll on every shot. The four bolt dual density cushion rails have great bite and deflection for more accurate shots, resulting in more satisfied customers. With the dollar bill acceptor and roll down coin mechanism, there is no need to convert bills to coins. This allows players to experience more games as desired without standing in line for change. The built-in top rail LCD screen displays accurate times when playing Speedpool, leaving less guess work about who played the fastest game. The Metro Coin's beautiful eight degree curved cabinet construction allows for a sleeker, more modern appearance and provides greater player comfort and control during difficult shots.

Combine these exceptional extras with the other standard Valley features, and you have a dramatic pool table that's in a class by itself.
