Dragon Punch

Unleash your wrath and challenge others to overcome a battle of strength, speed, and reflex. Dragon Punch is the newest computerized coin operated boxing machine that will fire up any environment. Courageous designs and stunning features make Dragon Punch a one of a kind wonder. Dragon Punch is a proven wonder and a must-have in every location.

Dragon Punch is equipped with a big electronic display showing the score of each punch. During the game, every participant can see and compare their result with the top score on the separate digital display. Once a participant shatters the previous scores, an additional bonus function allows players to play again.

Dragon Punch features a Urethane cushion pad underneath the genuine leather shell that is designed to groove with your fist. Optimized stitching patterns are parallel to the quality of a real punching bag that professional boxers use. In all, the punching bag is attached to a construction grade reinforced nylon rope that is independently attached to the main body. Unlike many other competitors, Dragon Punch does not insert and attach any metal chains, or other solid materials in the punching bag. A fine waterproof coating is also applied to the machine for optimal outdoor use and durability. The sleek construction and design of Dragon Punch is player friendly and it prevents any form of injury to the players. Dragon Punch promises to deliver safety, fun, and enormous profits in every location.
