

## The Ultimate in Coin Operated Pool Tables!

### Operator Features

The Great Eight™ delivers the best ROI in coin-operated pool tables. The standard of quality is displayed by the solid construction. The Imported slate is metal supported from side-to-side. The Valley® Teflon Ultra™ cloth is manufactured to resist stains reducing replacement costs and is available only on Valley tables. The LCD screen in the Great Eight table allows operators to view options and settings on command, such as price and time play settings. The LCD screen is an electronic timer and play controller, great for Speedpool™. The programmable Great Eight allows for more operator control and more profitable play. Operators can adjust the pricing options and program the table for happy hour, leagues, bonus games, and other specials.

### Player Features

The Great Eight Pool table is the ultimate experience in coin-operated pool tables. The imported slate, in combination with the fast Valley Teflon Ultra cloth, allows for a perfect roll on every shot. The dual density rails have great bite and deflection for more accurate shots. There is no need to convert bills to coins allowing players to experience more games as desired without standing in line for change. The LCD screen displays accurate times when playing Speedpool, leaving less guess work to who played the fastest game. Eight degree, angled cabinet construction allows for player comfort and control for difficult shots.

Valley pool tables are wrapped in plastic and packed in heavy duty cardboard with dense Styrofoam corner packing. Our packaging is sealed with 3/4" corrugated staples and bound with 5/8" high strength poly-banding.
