

iBoxer®

Striptease

After 100 years of developing, finally a machine that is a real brakethru. We are proud to introduce to you a new generation of boxer machines. It's hard to believe that we could fit so many great ideas into something so thin.

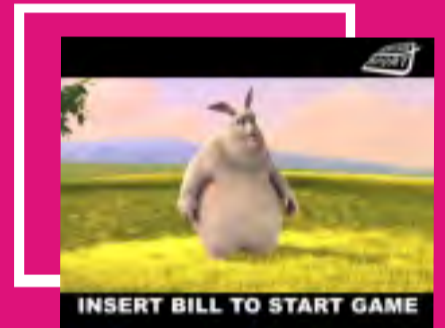

The iBoxer Striptease is the best combination of high tech custom made equipment. All fitted in one slim and beautiful design. One of the first things you'll notice about the iBoxer Striptease is how thin it is. The screen is 17 inches measured diagonally, so overall, it's slightly smaller than the casing. Also the powerful built-in speaker produces rich, full sound perfect for games or listening to music videos. iBoxer Striptease also comes with A/V output for external speakers and displays.
