

THE REVOLUTION ROLLS ON! JUMP ON BOARD!

Radikal
DARTS

WHAT IS THIS REVOLUTION?

Radikal Darts® is the result of years of research and continuous improvements, all geared towards the goal of developing an Electronic Dart Machine capable of opening up a new world of opportunities for operators and players, whether new or experienced.

Why is everyone talking about our Dart Machine?

Because it has an On Line system.

Two cameras, a laser, sensors and sports software mean you can play online in real time with your opponent in constant view, as well as a record of throws and results.

Radikal Darts® brings you a Dart Machine that means you can play live with other people in bars all over the world.

Because it has a Remote Refereeing System.

Radikal Darts® continuously and automatically sends all the generated to a server, and the operator, thanks to the strategic cameras, can view selected games at any given time and from any connection, and either validate or overrule the results.

With this patented system (European Patent 1639560, USA Patent US 7,811,000) you can organise all kinds of competitions regardless of player location or time of day, as they will be subsequently refereed.

The end result is a significant increase of games played. Radikal Darts® is already known as the electronic dart machine that offers the biggest market.

You can post your own advertising with just a click.

From your office computer you can create and send all kinds of videos to the Radikal Darts® Machine, which are then displayed on a 19-inch screen.

Now it couldn't be easier to advertise your tournaments, sell advertising space, announce the dates and venues of all your competitions, and much more.

Because Radical Darts is a new sports concept.

As a dart operator or dart association you can organise all kinds of competitions from your computer and send them to whichever **Radikal Darts®** Machines you like.

Radikal Darts® organises a huge darts tournament every year featuring the grand finals of national competitions plus an International Open with players from various countries.

The Darts Machines are connected to a website.

Log on to www.radikalplayers.com, a platform created for operators and players; a website where you can see all the classifications in real time, where players can check out their scores and change their profiles, where you can watch live games, or find your nearest **Radikal Darts®** game thanks to the Google Maps application.

Because distance is measured by laser.

The **Radikal Darts®** Machines includes a laser for measuring the exact distance from which the player has to throw, which avoids any arguments over measurements or having to mark out the floor with sticky tape.

 **The machine is equipped with software designed to make it more profitable.**

Forget about filling in score charts or having to be there in person during matches.

The **Radikal Darts®** software manages all the information, automatically scheduling matches and logging results, classifications, MPRs and PPDs, categories... absolutely all of which can be consulted from the comfort of your computer.

The information is also constantly available in the **Radikal Darts®** Machines and on the internet so players can refer to it whenever they want. And all in real time!

Main features

- 1 Panoramic 19" TFT screen
- 2 2 Cameras
- 3 Laser
- 4 Card reader
- 5 Display unit
- 6 Vandal-proof keyboard
