**Assembled Size:**  
41" L. x 36" W. x 51 3/4" H.

**Cabinet Apron Ht:**  
4 1/2"

**Weight:**  
230 lbs.

**6-Month "Top to Bottom" Limited Warranty**

Model # DM-Y-AB-1

**Ultra-Smooth Chrome-Plated Rods**  
Hollow-ground steel with 0.120" wall thickness. Marriage of high-lubricity materials—nylon bushings and rods—result in exceptional play performance with minimal friction wear.

**Solid Upper Cabinet Construction**  
MDF interior and a decorative, brushed aluminum exterior.

**Steel Rod Supports in Foot of Men**  
Allows torque and pressure to be applied to the clutch, rather than the fitting between the man and gear box.

**Playfield Supports Across Entire Surface**  
Supported on all 4 sides of the cabinet, by 2 beams running between the rods, and the tops of the player gear boxes.

Gear boxes are supported by durable extruded aluminum channels.

**Split Molded Base with Levelers**  
For easy installation through tight spaces.

Includes 4 leg levelers to assure level play surface—adjustable to 1".

**Infrared Electronic Scoring**  
Utilizes infrared scoring for reliability and accuracy. Sounds goal scored. Side mounted to keep player sight lines clear. Select from several game options including 15, 10, or 5 minute games, race to score 10, 7 or 5 goals, or unlimited Free Play.

**Gear Box Clutch System**  
Designed to "give" when opposing man-to-man force is applied—reduces likelihood of stick or man breakage and extends life of gear box.

**2:1 Turning Ratio on Gear Box**  
Delivers quick player response and lively play—360 degree player turn requires only 180 degree handle turn.

**Dome "Bubble" is Fastened with Hinges**  
Easy access to men, goals, and playfield.

**Attractive Playfield Graphics**  
Screened into high-pressure laminate and covered with a protective clear-coat for long wear.

**6-Month "Top to Bottom" Limited Warranty**

**If it sounds like hockey, looks like hockey and feels like hockey, it's gotta be a Blue Line.**

Bring the sites and sounds of an amusement favorite right into your home. The play is fast and the scoring is spectacular. The Slapshot features a unique gear box with a 2:1 turn ratio for quick player response and lively play. Turning players 360° requires only a flick of the wrist. And so the team doesn't get too worn out, we've designed

a clutch system that "gives" when there is opposing player-to-player force. The ultra-smooth rods are all chrome-plated, hollow-ground steel with 0.120" wall thickness and are coupled with nylon bushings for minimal friction. It's this sort of attention to detail that makes it a Blue Line... and makes Slapshot Dome Hockey such a big hit.
