

SLAPSHOT™

HOCKEY

Model # DM-Y-AB

Shelti™

There is a difference.™

Net years of family fun scoring this "one-timer" for your game room.

Bring all the sights and sounds of an amusement favorite into the home. Strong steel rods, coupled with Slapshot's super-fast gear-box action and clutch

system, make this game the real deal. An electronic scoring unit with an infrared sensor brings the crowd to its feet with every goal.

Standard Features

Rods are chrome-plated, hollow-ground steel with 0.120" wall thickness. Marriage of high-lubricity materials - nylon bushings and ultra-smooth rods - result in exceptional play performance with minimal friction wear.

Upper cabinet construction is made of a MDF interior and a decorative, brushed aluminum exterior.

Dome "bubble" is fastened with hinges for easy access to men, goals, and playfield.

Molded base includes 4 leg levelers to assure level play surface - adjustable to 1".

Playfield is supported on all 4 sides of the cabinet, by 2 beams running between the rods, and the tops of the player gear boxes.

Gear boxes are supported by durable extruded aluminum channels.

Gear box clutch system designed to "give" when opposing man-to-man force is applied - reduces likelihood of stick or man breakage and extends life of gear box.

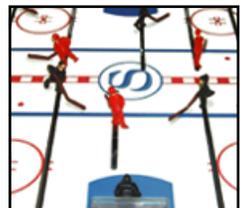

Gear box features a 2:1 turn ratio for quick player response and lively play - 360 degree player turn requires only 180 degree handle turn.

Men feature steel rod supports in foot - allows torque and pressure to be applied to the clutch, rather than the fitting between the man and gear box.

Attractive playfield graphics are screened into high-pressure laminate and covered with a protective clear-coat for long wear.

Electronic scoring unit utilizes infrared scoring for reliability and accuracy. Sounds goal scored.

Scoring unit is side mounted to keep player sight lines clear.

Dimensions		Weight
Length: 41"	104.1 cm	230 lbs
Width: 36"	91.4 cm	103.5 kg
Height: 52½"	133.4 cm	
Apron: 4½"	11.4 cm
