

GO GO Grand Prix

Super Slotcar Circuit

GAMEWAX JYUTO HOBBY

Easy To Play = Everyone Has Fun

Unlike traditional slot car racers, these cars don't come off the track. The race becomes highly competitive and the machine can be operated attendant free! The amount of pressure applied to the simple hand controller determines the speed of the slot car. If a player approaches a turn too quickly, the car will slide out slightly and brake while giving the hand controller a vibrating buzz from the "G-Force" motor.

Custom 1/32 Slot Cars

The specially designed 1/32 scale cars are engineered for maximum durability. Adjustments in weight distribution of the alloy chassis and changes in the rubber compound of the tires ensure game play with minimal maintenance.

42" Monitor with Camera

The race begins when a video is displayed of all the race competitors. The large screen will show updated positions of each driver along with live video footage of the drivers.
