STUDIO® series

THE FIRST MERCHANDISERS

You know what it takes to win. You have to be smarter, sharper and more dependable than the competition. You have to be in the right place, at the right time, with the right solution. With that thinking in mind, we've redesigned our Studio® Series line, inside and out. To give you an even greater edge, we made these merchandisers smarter and sharper… to increase your sales while saving you time and money. These are premium-feature machines with a no-nonsense attitude. And when it comes to impressing customers and increasing your profit potential … they mean business.

S³

No other merchandiser maximizes your turf like the Studio 3. With its street smart sensibilities, this premium merchandiser performs relentlessly on site after site. It's eye-catching looks and dependable features consistently turn high traffic areas into high volume areas. It can also host an À LA CARTE® fresh food or frozen food merchandiser, allowing you to further expand your sales.

À LA CARTE
ADD-ON

Increase your profit potential by hosting an À LA CARTE fresh or frozen glassfront – all at a lower investment vs. a stand-alone food machine.

MORE SELLING POWER

Our modern Metro styling ensures the products on your top shelf are fully visible, while our improved lighting makes your products shine (and sell). And if you really want to turn up the intensity, try our brighter bulb option that delivers up to three times the bulb life.

CONNECT WITH THE CUSTOMER

A deeper delivery bin with a contoured interior makes product retrieval easier, while our two-line scrolling message display promotes product sales by clearly communicating consumer messages.
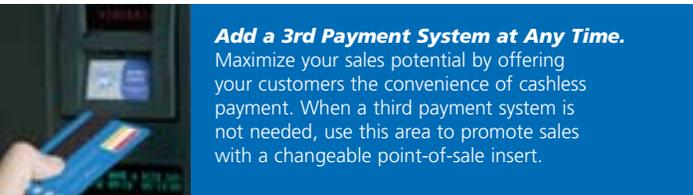

S²

Would more capacity give you more of an edge? The mid-size Studio 2 gives you a deeper cabinet than the S1. So you can stock more profit-making snacks with every route-stop.
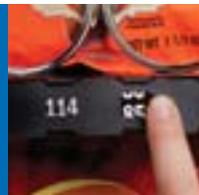

S¹

Ready to generate bigger profits in those smaller spaces? The Studio 1 is built with the same premium features and our higher standards … yet is more compact than the S2.

Add a 3rd Payment System at Any Time.
Maximize your sales potential by offering your customers the convenience of cashless payment. When a third payment system is not needed, use this area to promote sales with a changeable point-of-sale insert.

Scrolling Prices.
Pre-installed price rolls make machine set-up a breeze, while price changes can be made with the touch of a finger.

114

Industry-Leading Guaranteed Delivery System.
Our product detection system features twelve sensors per side for maximum vend recognition and your choice of mode operation. Keep an eye on both your profits and your customers' satisfaction.

PUSH

DESIGNED TO BE AS STREET SMART AS YOU.

KEEP IT SIMPLE AND SMART

Our two-digit electronics navigation and two-line text-based display make the Studio® Series merchandisers extremely simple to set-up, operate and service. Meanwhile, you'll enjoy advanced functions like our programmable shut-down by selection, space-to-sales, programmable messages and effective promotional modes. You can also toggle the electronics between English and Spanish – especially helpful with today's diverse workforce.

THRIVE IN THE FAST LANE

Time is money, and the Studio Series gets you there…faster. In addition to the direct menu navigation, Studio features more diagnostics than

ever for easy troubleshooting, automatic daylight-savings time-clock rolling, auto-recognition of peripherals, factory-installed price rolls and selection numbers for quick set-up, and so much more.

BOOST YOUR COMPETITIVE EDGE

With the Studio Series, you can outperform the competition by offering your clients customized energy savings with four different programmable conservation modes. Choose from lights off, vend off, low energy, or total shutdown.

CASH IN ON YOUR DATA

Studio offers both historical and interval sales data, and full DEX accountability – all of which can be instantly viewed at the machine.

EASE UP ON THE WORK LOAD

The lower shelves of the Studio snack merchandisers pull straight out for better ergonomics when filling, making life a little easier for route drivers.

A HIGHER STANDARD OF VALUE

The simple truth is, the Studio Series can do things the others can't. It's loaded with benefits, yet very price competitive. And nothing is built better, or backed better, thanks to local support through APi Distributors. With our total support, training, genuine APi parts, and a two-year warranty… it's clear you're getting A Higher Standard of value with Studio Series vending merchandisers.
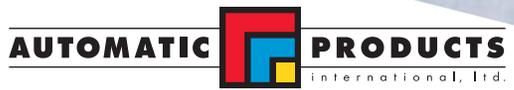

S⁴

The Studio 4 Snack/Can Combo merchandiser gives you two premium merchandisers in one street smart machine. The S4 delivers the critical high-end features you need – plus the capacity of three snack/candy shelves and 180 cold-can beverages.

S⁵

The smaller Studio 5 provides yet another size-smart way to capitalize out on the street. With three snack/candy shelves, and up to 104 cold beverages, the S5 works extremely hard in your special location needs.

A Higher Standard.

Smarter, Faster Set-Up.
Studio automatically recognizes when you have plugged in a peripheral device, and provides an instant and continuous visual LED confirmation when peripherals are properly attached.

Need an Extra Hand?
Use CHIP to make multiple machine installs a snap. Simply download your machine configuration to CHIP, and upload all set-up data to a like model in less than a minute.

Quick-Change Paired Motor Shelving.
Convert from candy to snacks without tools, and increase your planogram flexibility on the fly.
