EXCLUSIVE FEATURES OF THE *Fresh* COTTON CANDY FACTORY:

- Self-Cleaning System reduces location maintenance and assures consistently perfect product
- Climate Control maintains interior cabinet temperature at optimum candy making level
- Automatically adjusts heat for varying time between vends

Simply The Best!

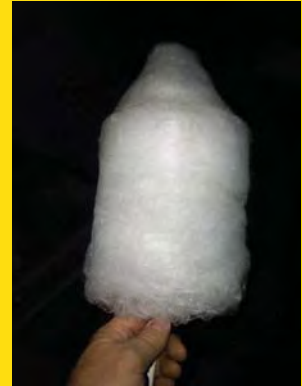

Exclusive Features:

• Automatic Self-Cleaning System

The first and only automated cleaning function that reduces the need for frequent manual cleaning & minimizes buildup of sugar on the sides of the floss bowl during operation.

• Automatic Climate Control

Maintains an optimum cooking environment inside cabinet by automatically adjusting for changes in temperature and humidity, producing consistently beautiful candy for customers!

• Stainless Steel Interior

Easy to clean & maintain with **no cheap plastics** to break or discolor or need to be replaced over time.

• Simplified Operation & Mechanics

Less moving parts mean less mechanical problems
Uses NO water in production.

• State-of-the-Art Technology

Uses only easy-to-find familiar parts, such as reliable optic sensors used throughout machine.

• Spin Head Operates at Normal Specs

Normal operating speed & heat = less wear & tear on critical mechanisms and components.

• Uses Ordinary Table Sugar

Uses easily to get granulated white sugar or flavored/colored floss sugars.

• Programmable Electronic Coin Acceptor

Can be programmed to accept any coin and eliminates many jammed coin service calls.

• Dollar Bill Validator

ICT A6 Validator for 1 & 5 dollar bills acceptance
Free online software updates.
