

Point-of-Sale System

Have a Prize Hub?

Have a Prize Counter?

Need an efficient way to count tickets?

Try Bay Tek's Point-of-Sale System.

This system will scan all 1D and 2D barcode ticket coupons from Bay Tek's Evolve boxes, Deltronics' Ticket Eater and Benchmark's Ticket Eater. The POS system enhances security by voiding the barcodes, preventing players from doubling up on prize redemption.

The Point-of-Sale System simply adds up the ticket values scanned in for each player, keeping a running total. Subtracting tickets for redeemed prizes is easy, and players can even get a printed coupon of their leftover tickets to keep for their next visit!

Required (not included): monitor, keyboard, mouse, Ethernet cable
Optional (not included): hand held scanner
