

Snack Machine

First presented by AMS in 1997, this is still our most popular vendor. Customers love its simplicity, dependability, and rugged construction. The Snack Machine is built in our AMS plant with the right choices of state-of-the-art manufacturing materials as well as an economy of construction. You'll come to depend upon this versatile and cost-effective merchandiser.

Rugged and Reliable Vendors with Energy-Savings and Cost-Saving Features

The **AMS** Epoch series is our newest line of vendors. It offers an attractive streamlined appearance, a new easy-to-use lighted numeric keypad, and ADA compliancy.

Epoch SERIES

Check Out Our Standard Features.

As you can see in the adjoining panel, **AMS** vendors come with many standard features including our useful escutcheon with a point-of-sales area for highlighting your company or product, and a lighted easy-to-read keypad.

Options

There's a great variety of **AMS** options. On behalf of your customer you can choose special dispensing kits, optional sizes, dual helixes, small trays, large trays, bin pads, vandal-resistant panels, **EnergySensit**® LED lighting, and more. Call us for details.

The **EnergyStar**® package, including LED lights and a modular refrigeration system is an option on AMS low-temperature merchandisers.

- The patented **Sensit**® **Guaranteed Delivery System** avoids hang-ups. Product dispensed or money refunded.
- **Home Positioning** means after the helix has rotated enough to ensure dispensing, it returns to its original position ready to dispense again.
- **Home re-set** returns helixes to original position if extra rotations were needed for the previous delivery.
- **Motor coupling** enables the vending of products in larger widths. It also means products can face straight-on, in full view of your customer.
- **Expanded motor linking** allows sequential vending of non-adjacent products.
- **Enhanced ValuVend** enables selected items to be discounted when vended together.

Our **Epoch** series includes the **AD-One** line; an ADA-compliant group of vendors with special configuration to meet the latest requirements of the federal government.

AD-One vendors are available in all models with the exception of our SlimGem, WideGem, and Outsider. The **AD-One** line, shown above in a six tray configuration, has the same great **Epoch** look and features, including our attractive and easy-to-read keypad. The **AD-One** line is also available in a variety of optional graphics and colors.

Automated Merchandising Systems Incorporated

AMS was founded in 1997. Our purpose is to bring to the vending industry, a reliable and rugged vendor offering guaranteed product delivery. Today, as you can see in this brochure, we offer several lines of merchandisers. The Sensit® delivery system has since been awarded over ten U.S. Patents, and the registered Sensit® trade mark is your assurance of consistent quality.

We have always insisted on quality at a reasonable price along with innovative advantages for our customers. All of us at AMS

work toward that end. AMS is proud to be a privately-owned business. Our employees are all known personally by management. Our plant in Kearneysville, West Virginia is a friendly place where management and employees even get together several times a year for an informal luncheon. It's a place where employee opinions are welcome and where employee awareness includes your requirement of quality products.
