THE GAME

The Name of the game is speed... Pure and simple. As a Pilot in the *Ballistics* races you unblinkingly propel your Speeder bike through magnetic tubes that serve as the racetrack. You are given a full 360 degree range of movement as you spiral along the magnetic track, avoiding obstacles & other racers that could slow you down, while at the same time maneuvering towards various power-ups. Power-ups include Super Boosters which allow you to accelerate at twice your normal capacity and Ice Which allows you to super-cool your high-octane engine.
