

Take to the road...in three different Cruis'n USA models.

In addition to the Cruis'n USA Full-Motion Simulator, Midway also offers two additional models to meet the varying needs of operators and their locations.

Both the Deluxe Sit-Down and Twin Deluxe Sit-Down models contain all the features of the original Cruis'n USA, with the exception of the three-axis motion mechanism. Each includes the identical UltraGraFX video, the incredible DCS Sound System music and sound effects, and the excitement and surprises, but scaled to fit your space and budget.

The Twin Deluxe Sit-Down model also features linked playing and optional custom neon signage above the cabinet to attract the eye and seize the attention of players. Whichever model you choose, each will provide players with unmatched driving enjoyment, mile after mile.
