## BATTLE ON THE EDGE

# The Force, the Speed, the Reality!

### Stick the Pedal to the Metal

With vibrant colors and roaring engines, race well known stock cars around the track at unlimited speeds. Drivers stick the pedal to metal while zooming through banks and turns. Using the slipstream to judge the drift before passing cars, drivers thrill crowds with the exciting close-up action! However, proceed with caution! Get too close and drivers can end up crashing so hard that you'll see sparks fly!

The inspiring power of the Model 3 Step 2.0 board outputs over 1 million polygons per second creating precise visuals of the racetrack and cars' chassis, even accomplishing the smoke and flames! The newest technologies combined with Sega's unsurpassed know-how contribute to the stunning simulation or real-life stock car racing!

- Witness the effects of collisions into walls, parts flying around, being caught up with passing cars, multiple smashups, smoke, and fire, just to name a few elements of racing!

- Catch the definite movements of the pit crew during pit stops and accidents through a latest feature, Motion Capture.

- Switch through four different view points:

frontseat, driver's rear, and bird's eye.

- Link up to 16 machines using a dedicated network! No other race game has a greater capacity in this area.

- Hear the thunderous engine sounds, sampled from the actual race cars! Its booming speaker system also captures the uproar of cars crashing into one another or other obstacles, even the "Doppler effect" as cars pass by.

- Feel the funky beat of the soundtrack collaborated in New York with Sega's own sound staff!

- Ultimate racing experienced by the steering and drift simulations! Feel the steering wheel jerk when colliding, handle through corners and straightaways.

- A new feature, The Crash Impact Generator, delivers shocks to the player's back and soles of their feet upon impact, including the feel of the engine's rumble.

**Method of Play:** To begin the race, choose your racetrack, car and choice of Automatic (AT) or Manual (MT) transmission.

### 3 different Car types:

- **Easy** - (for beginners) Controls easy according to steering. Top speed reaches 201 mph for AT or 204 mph for MT.

- **Normal** - (for your average player) Controls by the use of the accelerator and brake. Top speed: AT, 206 mph; MT, 208 mph.

- **Hard** - (for the serious player and racing fans) The player can make the car drift. Beat the fastest time!! Top speed: AT, 209 mph; MT, 212 mph.

### 3 distinctive Courses:

- **Beginner** - Race 8 laps with 40 cars on a basic Oval track.

- **Intermediate** - Race 4 laps with 20 cars on a tricky amusement park track.

- **Advanced** - Race 2 laps with 30 cars on this complex City track.

### 3 Race Modes, ensuring long-term arcade income:

- **"Beat the Clock"** - A time trial with only the player's car racing around the track. Hardcore players look to this track to take the highest scores.

- **"Real Players Only"** - Only the participating player's cars race. Excellent for intermediate and serious players playing in groups.

- **"No Assist"** - This mode removes the "Auto-Assist" feature that automatically speeds up the slower cars in linked play. Therefore, allowing a showdown of driving skills between the players achieving the high-level excitement of true-to-life racing!

Chums Gum AT/MT

Scorpio Plasma AT/MT

Phantom AT/MT

### Cabinet Dimensions:

Single Version 68" x 40.5" x 75.5"

Twin Version 68" x 81" x 75.5"

Deluxe Version 27.5" x 43" x 68"

Deluxe Car Body Platform

77.5" x 51" x 56.5"
