

# MANX Super Bike

# TT Twin

SEGA™

The Manx TT (Tourist Trophy) is billed as the world's most hazardous motorcycle competition.

The event has an 88 year history and, even today, runs over closed public roads on the beautiful Isle of Man, located in the Irish Sea between the UK and Ireland.

The new Sega game Manx TT Twin captures all the thrills and excitement of the races by computer graphic simulation of the island's narrow lanes, mountain passes and picturesque villages ... at an average speed of 200 kph!

Players will need a racer's determination to succeed as Sega's Manx TT Twin speeds towards a new horizon for motorcycle racing games with thrills and spills that were previously unimaginable.

Manx TT Twin features two skill levels and the ability to link up to 8 players.

The Laxey Coast course is for inexperienced racers but they will soon be ready for the advanced level, the TT course itself.

The racer can select automatic transmission (AT) or 6-speed manual transmission (MT) and the racing bike is steered by leaning to the left or right sides.

The courses are enthralling but tricky and offer the player the fullest sensations of real Super Bike racing.

Manx TT Twin not only attracts the players but also becomes a focal point for the whole arcade. The game grabs, and holds, the players' attention and guarantees high earning income.

- Undisputed race leader in the world of motorcycle games, Manx TT Twin allows players to place their feet either on the footrests of the bike itself or on the ground at the side of the machine. In addition, the muffler-type duct woofer speaker system generates the realistic sound of the motorcycle's exhaust roar from behind, giving players the actual sensation of riding.

- Another Manx TT Twin unique feature is the relay mode. Using this feature players can watch their race standings with other players on an unused relay monitor.

- Players can select either rider's eye view or rear view by using the Virtual reality (VR) button.

Real time textured mapping function plus CD board "Model 2" 29 inch monitor is adapted. The speaker system consists of six speakers in total four dome speakers and two woofers.

Overall dimensions	W: 238.3cm., 93.79 in.		TWIN 1/100
	D: 204.8cm., 81.40 in.		
	H: 201.5cm., 79.31 in.
