IF YOU'RE READING THIS, THEN THEY'VE TAKEN OVER...

Steven Tyler confers on direction with designers during the videotaping process at Midway Studios.

Monday, November 1st, 1996 (Election Eve): The New Order Nation—a corrupt alliance of government and big business—has abducted rock superstars Aerosmith from a Los Angeles concert hall and launched an offensive to control the world's youth. Legions of NCN party troops now control the world's cultural, scientific and technological centers. But youth is fighting back...and it's armed with a powerful weapon.

With REVOLUTION X, Midway steps boldly into the future and enters an entirely new dimension in video games. As players fight to rescue Aerosmith—and the world—they move up and down, left and right, forward and backward through incredibly detailed three-dimensional environments. Wave after wave...in LA, South America, Japan, the Middle East and England...every REV X screen is a maze loaded with more heated battles, astonishing boss monsters, secret weapons and hidden passages than any other Midway game.

REV X's unique non-linear playing system offers more destination options...and creates a different game for every player. At every juncture of the game, players must choose the area they'll explore next. It's an unprecedented level of interactivity that's complemented by the first-ever appearance by a rock band in a dedicated video game. All speech and digitized video footage of Aerosmith is original and was recorded at Midway's Chicago studios. Plus, REVOLUTION X rocks four of Aerosmith's biggest hits—"Eat the Rich," "Sweet Emotion," "Toys in the Attic" and "Walk This Way"—taken from the original studio master tapes and reproduced with DCS® Sound System precision and clarity.

For something truly revolutionary, get REVOLUTION X... the video game that will smash the state, and transform the state of the art.

31" GAME SPECIFICATIONS

Height	70"	180cm
Height w/ marquee		
folded down	71"	180cm
Width	40"	102cm
