## New Upright & Table-Top Dedicated Cabinets

The new 25" monitor dedicated cabinets from UltraCade are available in both Upright and Table-Top configurations. Both utilise top quality Wells-Gardner monitors for a great picture and excellent reliability.

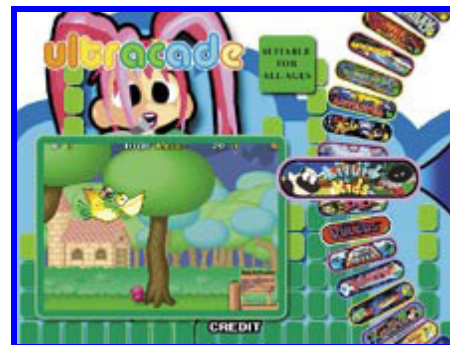

The cabinets come complete with 85 games installed and ready to go out of the box. Players simply select the game they wish to play using the built in trackball or joysticks. Extra games are available via easy to install Gamepacks such as the Trackball Classics Pack and the Midway Smash Pack. All games are 100% licensed for commercial use.

The operator can remove games and re-insert games into the menu if desired. UltraCade's sophisticated accounting engine has the ability to track earnings for each game and can display the results sorted by name, manufacturer or earnings.

## Easy Testing Features

With UltraCade's diagnostics engine, troubleshooting is a snap! From the easy to use operator interface, the operator can test all the buttons, joysticks, sound and the monitor. The entire JAMMA harness can also be displayed graphically on screen to help detect shorts as well as faulty components or wiring.

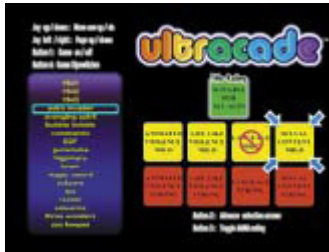

Conversion kits for your own cabinets are also still available.
