First, we would like to thank you very much for purchasing the QuadAir from Barron Games International. [This product is a multi-player game for an entertainment centerpiece.]

For your own safety, please read through this instruction manual that we have prepared for you thoroughly, and take precautions when using the product. We hope that you will become accustomed to the product quickly.

Note before assembling

1. Inspect to make sure all of the parts are included and not damaged.
2. Prior to assembly, you must ensure there is sufficient space for placing or shifting this product.
3. QuadAir needs at least 6 people for assembly and ensure your safety and the safety of others around you when moving the product.

Tools required for assembling

- QuadAir Manual
- Screw Driver or Drill
- Scissors
- QuadAir Door Key [located inside the table]

*Note: Prepare the above specified tools. Be careful not to damage the product while using these tools

Assembly Procedures

1. Use scissors or a knife to cut* through the packing tape.
**Do not cut too deep or you will damage the unit.*

2. Open the cardboard box to ensure the wooden side is facing up and the playfield is facing down to the floor.

Use a screw driver or drill to unscrew the 4 screws on the panel with the sticker “PARTS” on it. Once the panel is opened, please take out the parts indicated below.

For Legs

16 Roundhead screws M8x25
16 Flat washers M8x16

For machine

3 serial number 2868
QuadAir keys

After taking out the keys, open the center door panel, and take out all other parts from inside of the machine's body.

20 Pucks

+

2 Red Mallets

+

2 Blue Mallets

1 Polish Spray Wax

+

1 AC power cord

Take out the 4 QuadAir plastic legs and screw the adjustable leg levelers onto the base of the legs. Place the legs on the bottom surface of the table. Ensure alignment and then attach with the big flathead screw M5x35 and washer M8x16. **Make sure grey surface is facing out.*

Attach power cord to cord holder.

Attach the leg levelers to the base of legs.

Tightly attach.

Grey surface

- (1) roundhead screw M8x25
- (1) flat washer M8x16

Ensure all legs are tightly attached then flip the table 90 degrees. This action requires at least 6 people. Flip it another 90 degrees to place the legs on the ground. **Place the included foam padding on either side of the goal release bay. Do not damage the goal bay or LED lights.*

Foam Padding

Safety Instructions for use and play.

Risk of Electric Shock

- Hazardous voltage which can cause electrical shock exists inside the equipment. Only qualified personnel should work inside the equipment.

Playing Warnings

- Do not hit the puck with the mallet when the puck is not level and flat.
- Spectators should not stand by the side of the table. This may cause injury.
- Hold the mallet by the handle and not the base or the puck may hit fingers.
- This game features flashing lights which may not be suitable for photosensitive epilepsy.

Warning labels are attached by the goal of each side.

How to Play QuadAir

1. Need 2 Players to Start. Insert credits.
2. Defend your Goal! You have 5 lives.
3. After 5 lives Game Over. Time is limited.
4. Insert coin to continue game.

Do not hit the puck with the mallet when the puck is not level and flat.

The diagram shows two scenarios of a mallet hitting a puck on a green goal line. In the left scenario, a red 'X' is placed over the mallet head, and a red starburst indicates an incorrect hit. In the right scenario, a red circle is placed around the mallet head, and a red starburst indicates a correct hit.

⚠ ATTENTION

**This game features
flashing lights which
may not be suitable for
photosensitive epilepsy**

**Spectators should not stand by the side of
table. This may cause injury.**

**Hold the mallet by the handle and not
the base or puck may hit fingers.**

Manual for the software of the machine

First, ensure the power is off. Open the door with a key. Hold the panel's handle and pull it out until half of the power panel is exposed.

Descriptions of internal hardware

Note: Do not touch open terminals or exposed wires while the game is on. Risk of electric shock.

Function Descriptions of all hardware

Note: Avoid electric shock. Do not touch open terminals or exposed wires. Please turn off the game to perform repairs.

Power Supply

Provides power to all internal components, such as the motherboard, coin mechanism, motor... etc. The +5v and +12v are separated to ensure no interference to components when one has an insufficient supply or an unstable supply of power.

Note: +5v is on the left +12v is on the right

Motherboard

Controls the operation of all internal components. Malfunctions or errors with any of the components can be diagnosed by looking at the LED light indicators on the motherboard.

Descriptions of light signals and DIP Switches

Error Lights

- Light A Goal Sensor Signal
- Light B Start Button Light Signal
- Light C Coin Mechanism Light Signal
- Light D Ticket Light Signal
- Light E Rail Noise Strike Light signal

How to fix the goal gate.

If the gate is clicking, it is because the solenoid is not catching in the Solenoid Capture hole. During shipment and installation the solenoid can bend inward toward the gate. This results in the solenoid not catching in the capture hole. To remedy pull the solenoid and slightly bend the bracket down, away from the gate until the solenoid is completely in the capture area and stops the goal gate from “clicking”. The clicking noise is the sensor switch not getting the information to “lock” by the solenoid.

Instructions:

- 1) Remove gate from table
- 2) Bend bracket down
- 3) Ensure proper alignment between solenoid and solenoid capture hole.

Goal Gate Troubleshooting Manual

- Remove the screws from the **left** and **right** side of the goal gate assembly

- The internal parts of the goal gate assembly will now be exposed

- Remove all **four** screws

- Remove the motor

Barron Games QuadAir Goal Gate Assembly

- Enlarged motor

- 1) Remove the gear screws using an Allen Key
- 2) Pull the gear straight up

- Pull up to remove the gear

- Remove all three screws

- Fully detached motor

Attention:

Please note that there are **two** different size screws used on the QuadAir motor. Screws (1) and (2) are longer than (3), and they must all be placed back into the same holes they came from. A misplaced screw will damage the internal workings of these motors. Please see the attached pictures and contact the Barron Games service department at (716) 866-0054 with any questions.
