

TICKET Xchange

Distributed by:

HOW IT WORKS

- Customers feed tickets into the Ticket Xchange, the tickets are counted and shredded with the count displayed on the LCD Touch screen, the customer has the option of selecting a prize or storing the Ticket count onto a Member's Card for later use. Customers can use the member's card to accumulate points for higher value prizes (no need to carry around huge bundles of Tickets and receipts). This creates repeat customers that you may not have had before!
- The Ticket Xchange machine will allow you to put many different redemption games into locations where they couldn't go before. It also gives you the option of hooking up to 8 Prize Dispensing Cabinets together for the maximum quantity and variety of prizes.

FEATURES

- Touch Screen LCD Control (Easy to use)
- Uses Bar coded tickets for security
- Coin acceptor to Buy in extra Tickets
- Members card for storage of Ticket Count and Name
- Dispenses Members card for customers
